INTERNSHIP PROJECT / FULL STACK DEVELOPMENT

VOLT GYM

Website & Enquiry Management System

A responsive digital experience for gym discovery, membership information, member feedback and staff-side enquiry management.

PROJECT OVERVIEW

01 — 25

A digital front door for a neighbourhood gym

Volt Gym brings the gym’s identity, training options and membership plans together in one responsive website.

The same experience also supports structured visitor enquiries and star-rated reviews, with a private admin inbox for staff.

Discover	Enquire	Manage

PUBLIC WEBSITE → PHP API → MYSQL → ADMIN INBOX

Why this project exists

A gym website should answer the questions people have before they visit.

INFORMATION GAP

Visitors need clear details about services, coaches, hours, location and membership choices.

CONTACT FRICTION

A structured enquiry form provides a direct way to request a visit or share training goals.

FEEDBACK VISIBILITY

A staff inbox brings incoming reviews and visit enquiries into one manageable workflow.

PROJECT RESPONSE

A polished public-facing website connected to a lightweight submission-management backend.

Objectives and project scope

PRESENT THE GYM

Explain the brand, mission, programs, trainers and membership options.

SUPPORT ENGAGEMENT

Let visitors request a visit and submit star-rated feedback.

ENABLE ADMIN REVIEW

Protect staff access to incoming submissions and read-status controls.

IN SCOPE

Responsive public website

Interactive UI sections

IN SCOPE

PHP endpoints

MySQL persistence

IN SCOPE

Admin login

Inbox and read state

NOT BUILT

Online payments, member accounts or live booking are not part of the current scope.

The current website presents membership information; it does not process membership payments.

A bold identity, built around contrast

TRAIN
BEYOND
LIMITS

Brand line

CORE COLOURS

Charcoal

Volt red

Warm cream

Muted grey

Typography pairs condensed display headings with a clean sans-serif body font. Large photography, simple grids and red action accents maintain a consistent visual rhythm.

Homepage and hero slider

FIRST IMPRESSION

A strong visual identity, clear navigation and obvious next steps.

SECTION NAVIGATION

Jump to About, Vision, Programs, Gallery, Trainers, Reviews, Membership and Contact.

HERO CAROUSEL

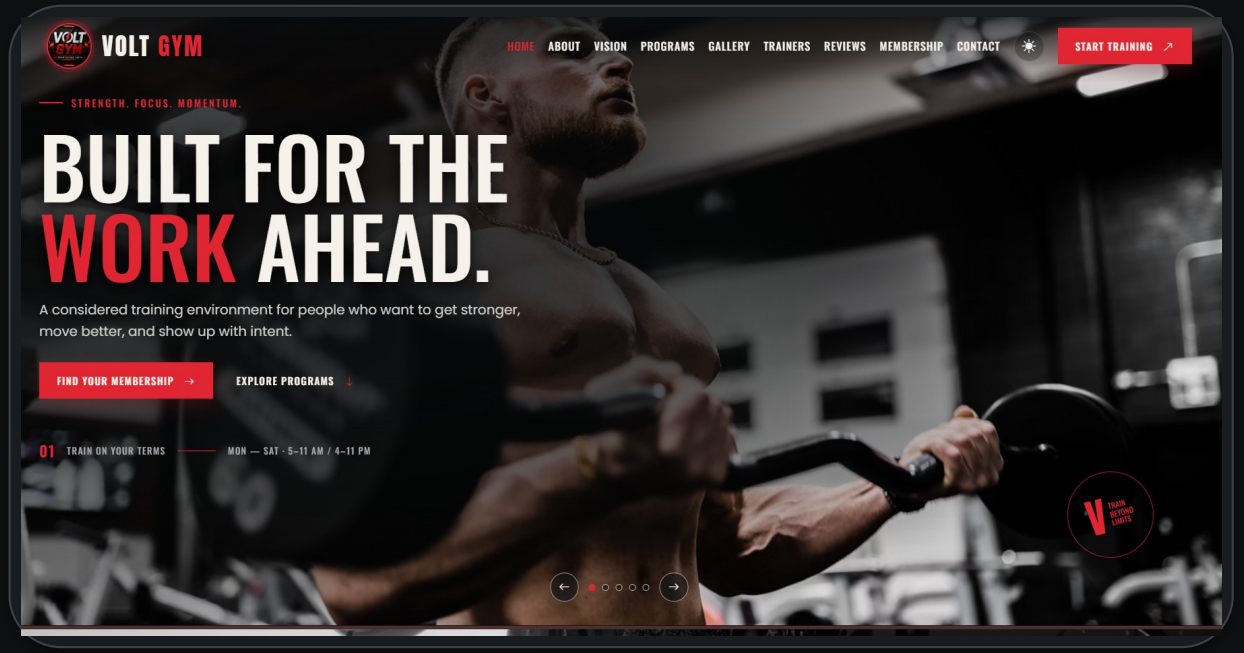

Previous/next controls and pagination dots switch the featured slide.

PRIMARY ACTIONS

Calls to action guide visitors toward membership and programs.

THEME PREFERENCE

Light/dark mode preference is saved across visits.

Homepage screenshot cropped to the website viewport; browser chrome removed.

About, vision and mission

ABOUT VOLT

Introduces the training environment and the gym's approach to consistency.

VISION

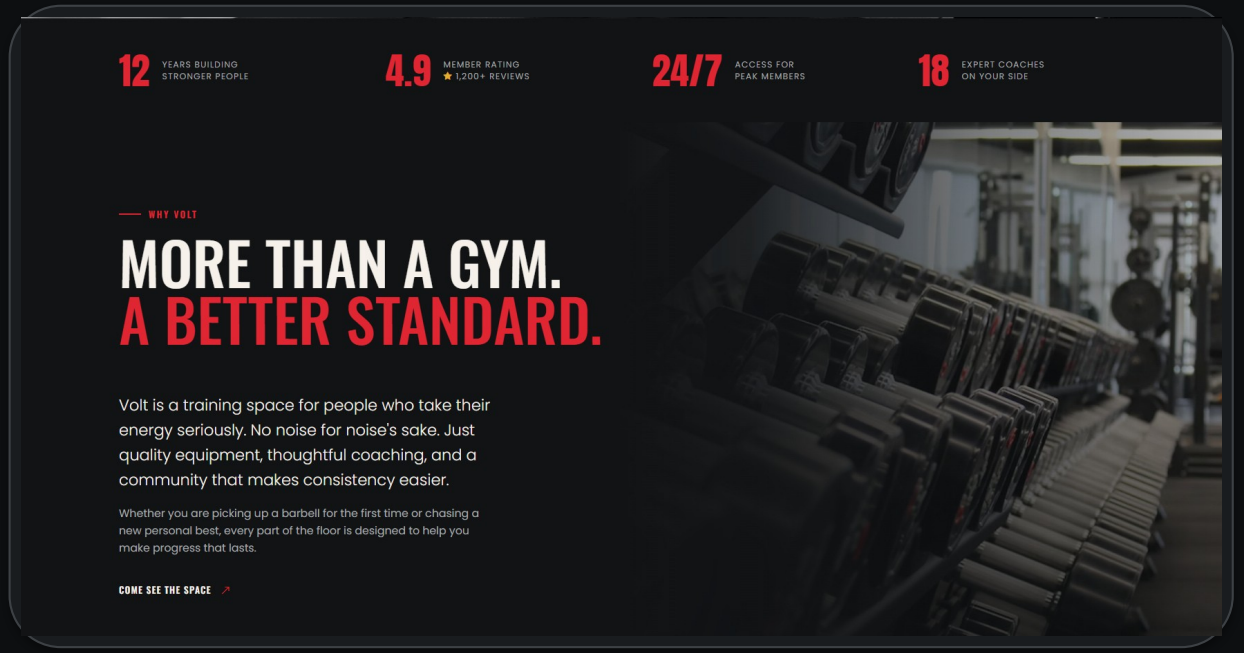

Make strength, movement and self-respect part of everyday life.

MISSION

Pair coaching with a welcoming space where progress is measured and shared.

CONTENT DESIGN

Short copy and paired cards make the brand purpose easy to scan.

Brand story and vision/mission section.

Training programs and services

Three pathways help visitors find the kind of training that fits their goals.

01 STRENGTH FOUNDATIONS

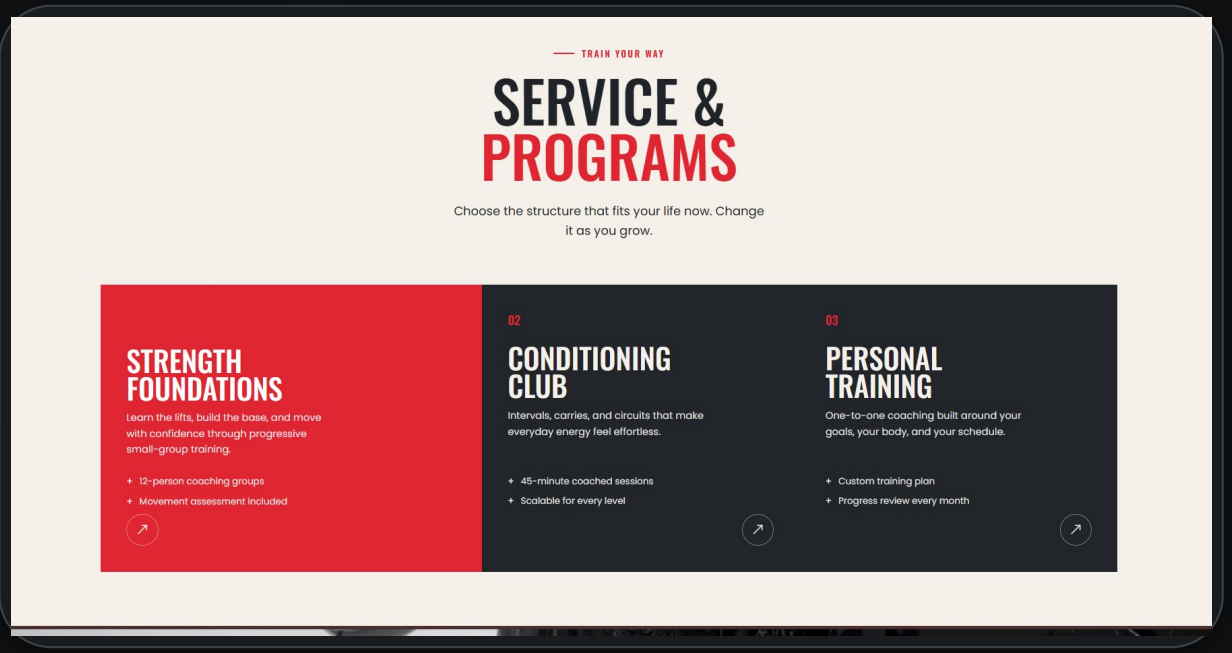

Lifting fundamentals and confidence through small-group training.

02 CONDITIONING CLUB

Intervals, carries and circuits designed to build everyday energy.

03 PERSONAL TRAINING

One-to-one coaching, a custom plan and regular progress reviews.

Programs page — actual website screenshot.

Inside Volt: the training gallery

VISUAL TOUR

A gallery of equipment, strength areas and conditioning spaces.

SELECTABLE IMAGES

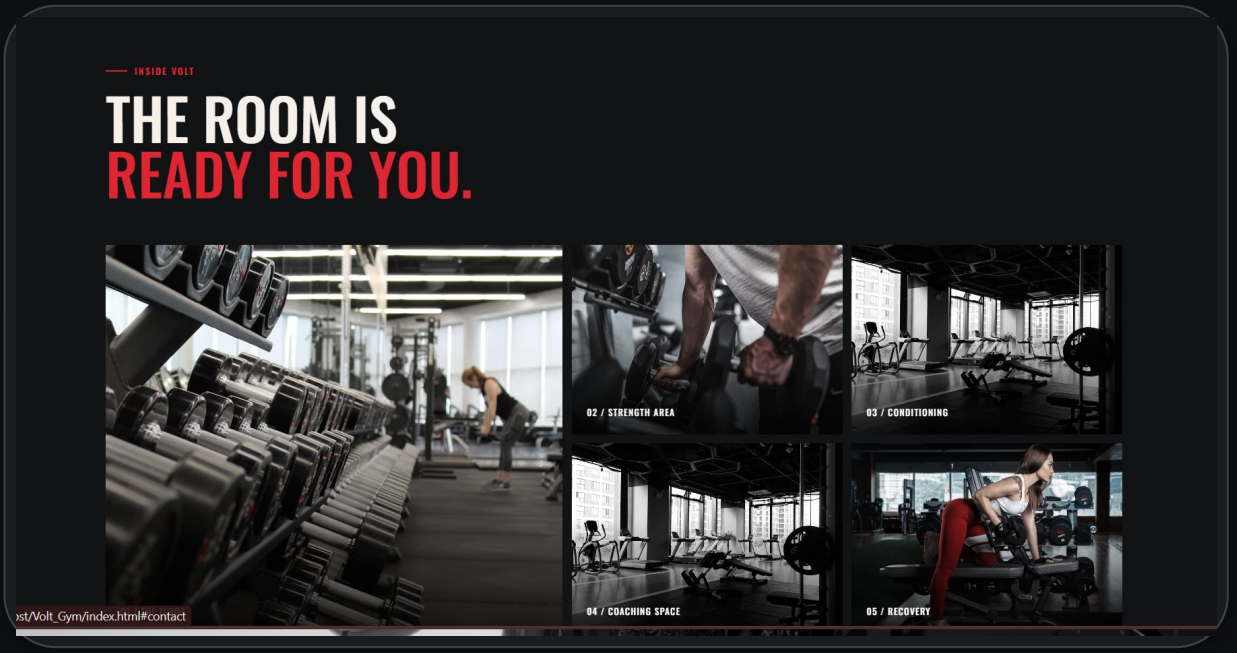

Visitors can open selected photos in a larger lightbox view.

VISUAL HIERARCHY

One large feature image is balanced by smaller supporting tiles.

PURPOSE

Photography helps visitors picture the environment before they arrive.

Gallery section with the original browser frame cropped away.

Coach and trainer profiles

SPECIALISATIONS

Profiles highlight the coaching discipline and trainer identity.

EXPERIENCE LABELS

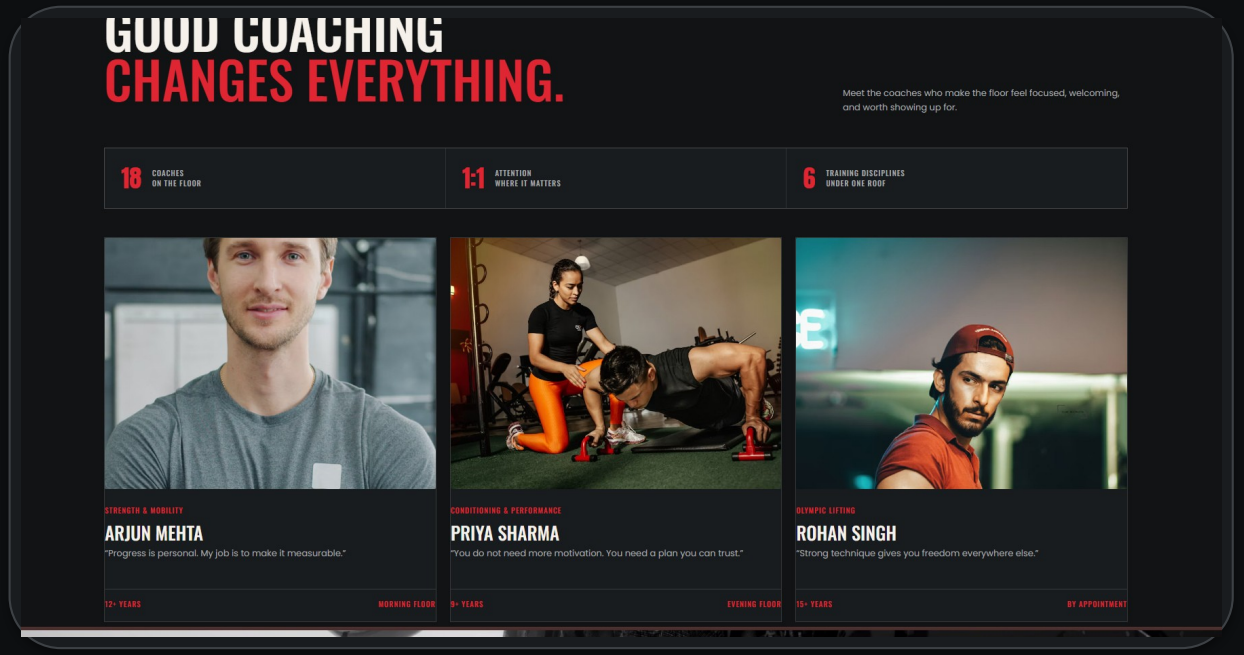

Years of experience and short quotes add context.

TRUST & CLARITY

The section helps prospective members understand the coaching offer.

SCOPE NOTE

Profiles are presentation content; there is no staff-management module.

Trainer cards as displayed on the public site.

Member reviews and feedback

TESTIMONIAL CAROUSEL

Previous/next controls and pagination navigate member quotes.

REVIEW FORM

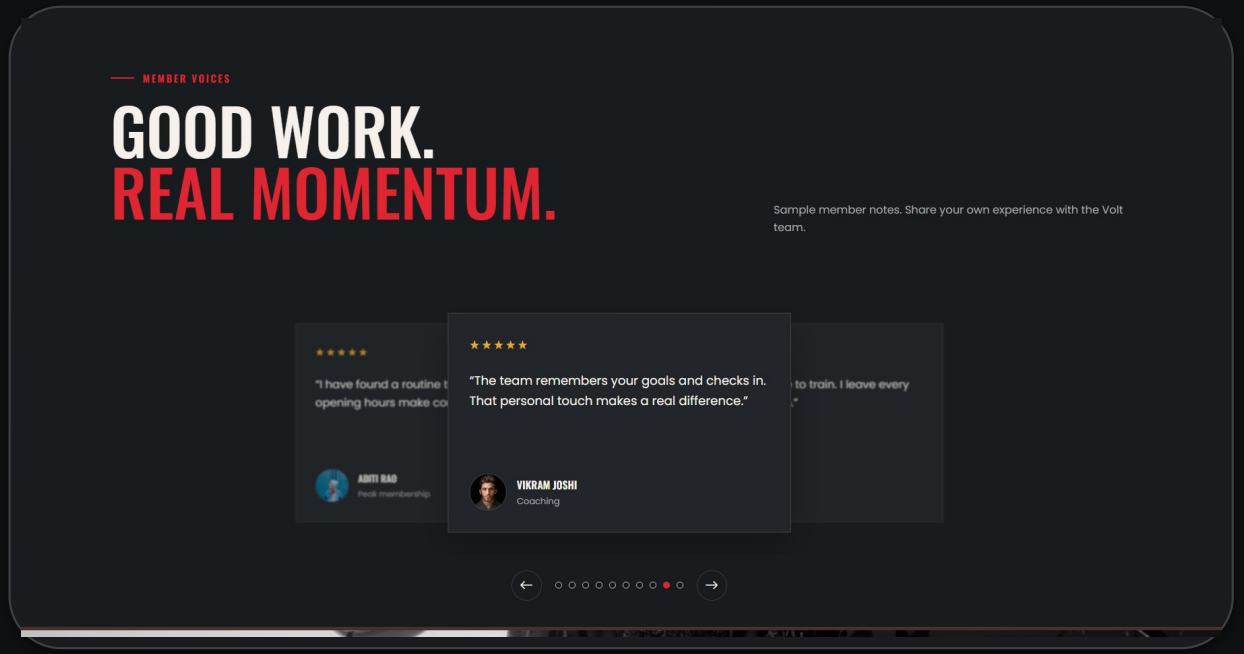

Collects a name, a 1–5 star rating and written feedback.

OPTIONAL CONTACT

Email and phone fields are optional individually; backend requires a contact method.

PERSISTENCE

Accepted reviews are stored for staff review.

Member review experience.

Membership plans at a glance

ESSENTIAL

₹1,000

/ month

- Full gym access, 06:00–22:00
- Changing rooms and recovery area
- Monthly movement check-in

PEAK

₹1,500

/ month

- 24/7 full gym access
- 4 coached classes each month
- Quarterly goal-setting session

PERSONAL

₹3,000

/ month

- Everything in Peak
- 4 personal training sessions
- Custom training program

Prices and benefits reflect the current website interface; payment processing is not implemented.

Contact and visit enquiry

CONTACT DETAILS

Address, opening hours, phone and email are shown together.

LOCATION

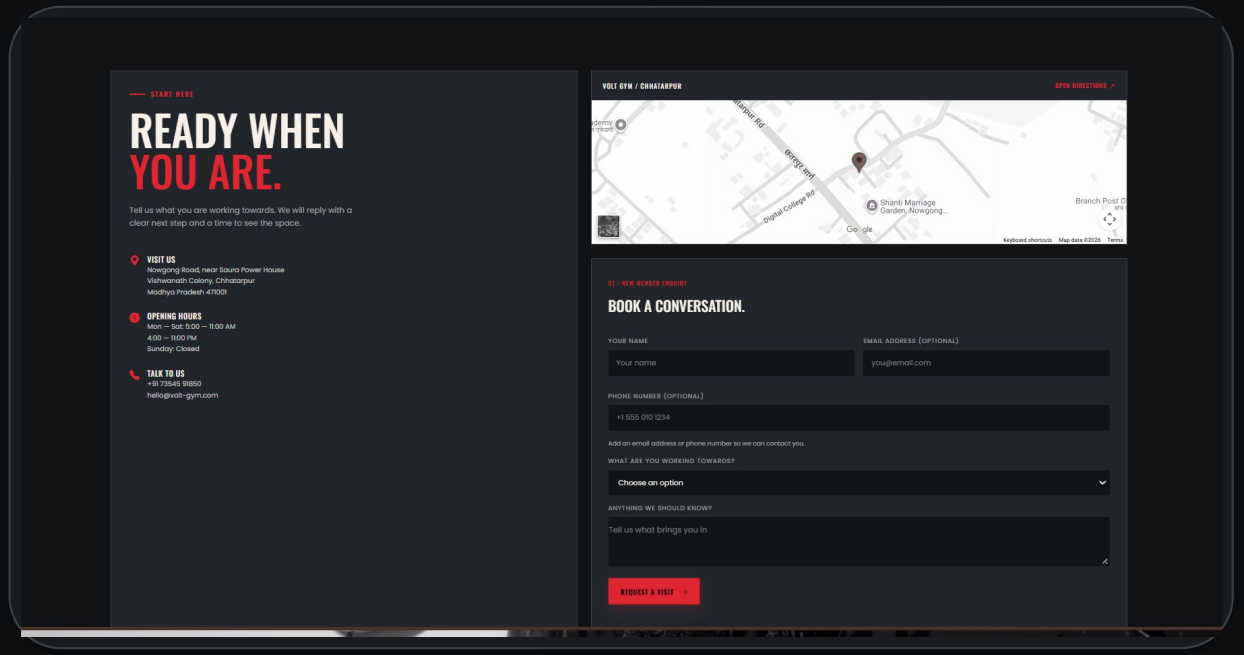

An embedded map helps visitors find the gym.

ENQUIRY FIELDS

Name, email or phone, training goal and an optional message.

SUBMISSION FLOW

The form sends a request to the PHP API for validation and storage.

Contact section and visit request form.

Responsive UI and interaction design

NAVIGATION

Section links and responsive mobile navigation.

THEME

Light/dark toggle with saved preference.

CAROUSELS

Hero and review controls with pagination.

GALLERY

Selectable images and lightbox behaviour.

Usability details

ACCESSIBILITY

Controls include descriptive labels where appropriate.

MOTION

Reduced-motion preferences are considered in the stylesheet.

CONSISTENCY

Buttons, cards, spacing and colours follow a shared design system.

Technology stack

HTML5

Semantic structure and content

CSS3

Responsive layout, themes and visual effects

VANILLA JS

Carousel, lightbox, theme and form interactions

BOOTSTRAP

CSS utilities and Bootstrap Icons

PHP

API request handling and admin dashboard

MYSQL + PDO

Persistent storage and prepared queries

XAMPP

Local Apache, PHP and MySQL environment

GITHUB ACTIONS

Static-site deployment workflow

No frontend compilation step is required for the public website.

How the system components connect

01

VISITOR BROWSER

HTML · CSS · JavaScript

→

02

PHP API

api.php · validation

→

03

MYSQL DATABASE

volt_gym schema

→

04

ADMIN PANEL

admin.php · session

WRITE

READ / UPDATE STATUS

PUBLIC FORM SUBMISSION

Browser sends JSON to PHP; valid records are stored in MySQL.

STAFF INBOX

Admin reads saved records and marks submissions as read.

Source code map

```
Volt_Gym/
├── index.html          Main public website
├── assets/
│   ├── css/            Stylesheets and Bootstrap CSS
│   ├── js/             Frontend interactions
│   ├── image/          Logos, portraits and photography
│   └── font/           Local font assets
└── php/
    ├── api.php         Form submission API
    ├── admin.php       Admin dashboard
    ├── config.php      Database configuration
    └── schema.sql      Database schema
```

PUBLIC LAYER

HTML, CSS and JavaScript run directly in the browser.

SERVER LAYER

PHP endpoints process requests and connect to MySQL.

DEPLOYMENT NOTE

GitHub Pages can host static files, but it cannot execute PHP.

Backend and form processing

01
REQUEST
POST JSON payload

→

02
VALIDATE
Required fields and formats

→

03
PERSIST
Prepared SQL insert

→

04
RESPOND
HTTP status + message

api.php

Handles review and enquiry POST requests; returns validation errors or success responses.

config.php

Builds the PDO database connection from environment variables or local defaults.

DATABASE WRITE

Accepted submissions are inserted with prepared SQL statements.

Database design

inquiries

id · name · email · phone
goal · message · created_at

reviews

id · name · email · phone
rating · message · created_at

admins

id · username
password_hash · created_at

admin_read_status

submission_type · submission_id
read_at

SCHEMA NOTES

DATABASE

volt_gym · utf8mb4 character set.

VALIDATION

Review ratings are constrained to 1–5 stars.

ADMIN ACCOUNTS

Unique usernames; passwords stored as hashes.

READ STATE

Submission type and ID identify read-status records.

Admin authentication and safeguards

ACCOUNT CREATION

create_admin.php is CLI-only and hashes the chosen password.

SIGN-IN

Admin login verifies credentials against the stored password hash.

SESSION

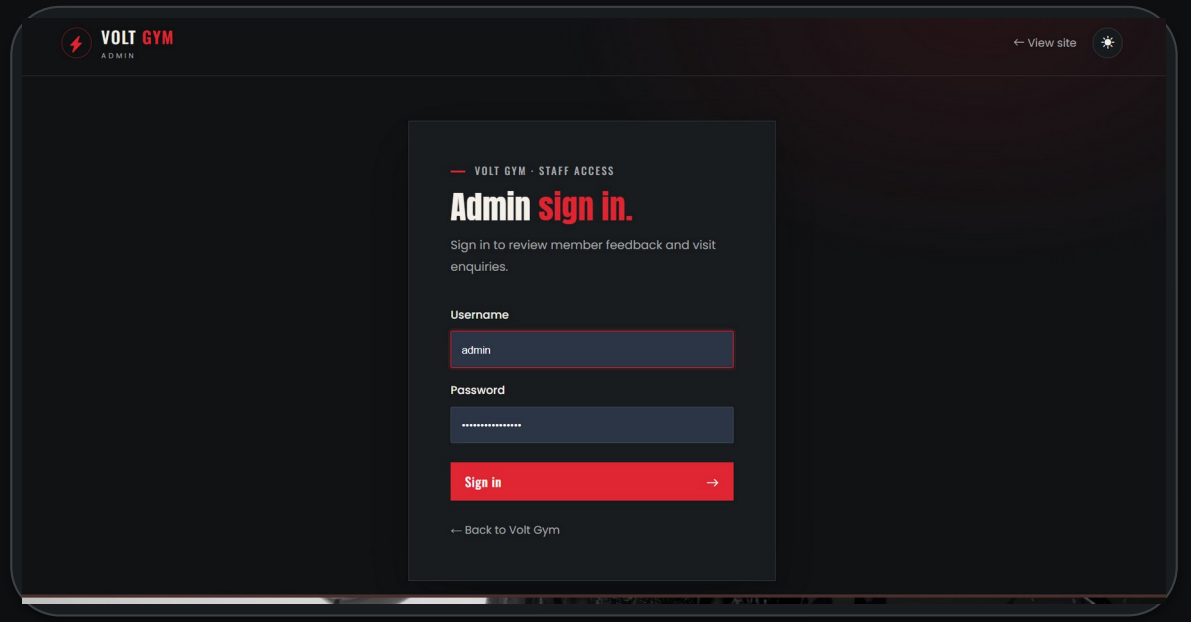

Session-based authentication protects dashboard actions.

CSRF PROTECTION

Admin POST actions include a server-validated session token.

SAFER DEFAULTS

Session-cookie settings and response headers add protection.

Staff-only sign-in page.

Admin dashboard and submission inbox

ONE STAFF-ONLY VIEW

Feedback & enquiries.

OVERVIEW

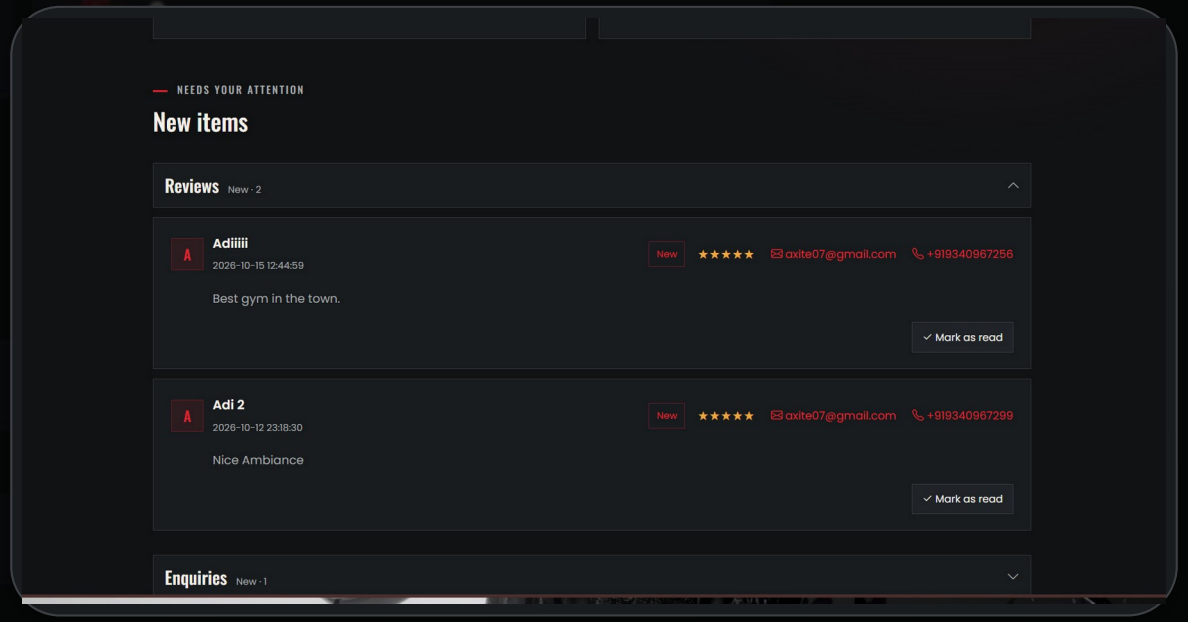

Total review and enquiry counts.

NEW ITEMS

Incoming submissions grouped for attention.

READ STATUS

Mark items as read and keep track of reviewed records.

Admin inbox displaying submitted reviews and enquiries.

Validation, security and testing

INPUT VALIDATION

Name, contact method, email/phone formats, rating range and message length.

DATABASE SAFETY

PDO prepared statements and exception-based database error handling.

ADMIN SAFETY

Password hashing, session checks, CSRF validation and output escaping.

PRE-SUBMISSION TEST CHECKLIST

- [ ] Submit a valid enquiry and confirm it appears in the admin inbox.
- [ ] Submit a valid review and verify its rating and text.
- [ ] Try invalid contact details and out-of-range ratings.
- [ ] Sign out and verify the dashboard cannot be accessed directly.

Run the project locally

LOCAL FULL-STACK SETUP

01 Place the project in C:\xampp\htdocs\Volt_Gym

02 Start Apache and MySQL in XAMPP

03 Import php/schema.sql using phpMyAdmin

04 Open http://localhost/Volt_Gym/

05 Create an admin account with php/create_admin.php

06 Sign in at /php/admin.php

STATIC PREVIEW

GitHub Actions deploys the static frontend to GitHub Pages.

IMPORTANT LIMITATION

GitHub Pages does not execute PHP; form persistence requires a PHP-capable server and MySQL.

Use local XAMPP to demonstrate the full-stack form and admin workflows.

What the project delivers — and what comes next

CURRENT DELIVERABLE

BRANDED WEBSITE
Responsive gym information site with interactive sections.

MEMBER ENGAGEMENT
Programs, gallery, trainer, review and membership pages.

FULL-STACK WORKFLOW
PHP/MySQL handling for enquiries and reviews.

STAFF TOOLING
Protected inbox with submission read-status management.

POSSIBLE NEXT ITERATIONS

MEMBERSHIP
Real registration and online payment integration.

MEMBER PORTAL
Accounts, attendance and progress tracking.

CONTENT MANAGEMENT
Admin tools to update plans and website content.

PRODUCTION HOSTING
Deploy PHP backend and database on a secure server.

VOLT GYM / ASTGEN SOFTWARES LLP

THANK YOU.

Thank you for your time and consideration.
